AutoPlay Media Studio™ 7.5

Visual Multimedia Software Development System

VISUAL DEVELOPMENT

Designed to make developing professional applications as easy as possible, even with no previous programming experience. Drag and drop your content onto a page and then double-click to edit. It's incredibly easy to do.

INTERACTIVE OBJECTS

Over a dozen interactive object types to choose from including buttons, videos, web/HTML, Flash, edit fields, rich text, slideshows, menu bars and tree controls.

FULL SCRIPT ENGINE

Includes more than 500 high level actions with everything from XML parsing and database queries to web server script interaction, file transfers and much more.

WORLD-CLASS SUPPORT

We back up your purchase with an included technical support and maintenance plan.

- Create professional AutoRun CD/DVD's and multimedia software. Perfect for visual database programming, business application development and other agile software development projects.
- Create applications using a drag and drop visual environment that work on any Windows system from 95 to Windows 7.
- Indigo Rose Software products are trusted by over 20,000 software developers worldwide for reliability and exceptional technical support.

AutoPlay Media Studio 7.5 is a rapid application development platform with unparalleled multimedia capabilities. It specializes in combining content such as images, music, video, Flash and HTML into fully customized software applications. AutoPlay Media Studio's visual approach to design makes it easy for anyone to create their own applications, even if you have absolutely no programming experience. It's the perfect tool for creating CD/DVD autorun menus - but that's just the beginning. It's also being used for thousands of creative applications like interactive presentations, training applications, web tools and more.

Simply drag and drop your content and controls onto a blank page and arrange the layout with your mouse. Adding interactivity is a snap. With a few mouse clicks you can add buttons to navigate between pages, start and stop videos, run programs, open documents, send emails, view websites, download files and so much more. The only limit is your imagination!

AutoPlay Media Studio 7.5 is the result of over 15 years of experience creating software development tools. You can rely on Indigo Rose to provide reliable tools, top quality documentation and superior technical support.

AutoPlay Media Studio was the pioneer in multimedia autorun CD/DVD menu tools. After many years and many popular versions, it has evolved into a sophisticated multimedia platform. AutoPlay Media Studio brings advanced multimedia development abilities to business users, video producers, educators, content distributors and software developers wanting a rapid application development tool. Try it today and see for yourself.

AutoPlay Media Studio™ 7.5

Features and Benefits

AutoPlay Media Studio excels at making multimedia applications by bringing together different types of media and presenting them in an attractive, customized way that is fully interactive. Impressive multimedia projects can be created faster and easier with AutoPlay Media Studio than with any traditional software development tool (such as Visual C++, Delphi, or Visual Basic). In fact, fully functional applications can be created in a matter of minutes. Whether you're a complete novice or a seasoned programmer, you're going to love AutoPlay Media Studio's visual approach to software development. Try it today and see!

PROJECT TEMPLATES

Choose from a variety of ready-to-use projects and then modify them to fit your needs. We include examples of software installer menus, electronic business cards, marketing brochures and many others.

ACTION WIZARD

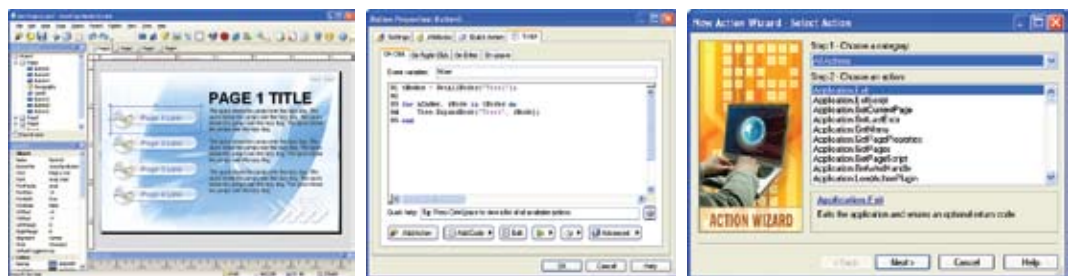

You don't have to be a wizard to create powerful software applications. We've built the wizard into the software! Choose the action you want to use, fill in the requested information fields and the wizard writes the script for you.

EASY PUBLISHING

Distributing your finished project is a snap. Whether you'd like to create a single-file executable for distribution by web download or email, or burn it to a CD/DVD data disc, it just takes a few clicks.

COMMUNITY

AutoPlay Media Studio developers are a friendly bunch of people. Join our online community forums where you'll be able to share ideas, learn tips and tricks, and discover hundreds of new uses for this empowering tool.

AutoPlay Media Studio is part of Indigo Rose Software's complete line of professional software development tools, which also includes MSI Factory, Setup Factory, TrueUpdate and Visual Patch. Each tool is a leader in its class, providing extraordinary value and reliability. We've been creating tools to manage the complete software deployment life cycle since 1991.

Rapid Visual Development

- Publish directly to CD-R/CD-RW or DVD±R/DVD±RW media. Simply insert a blank disc and the wizard will burn your project for you.
- The Project Explorer gives you an overview of your entire project in one place. You can see all of the pages, events and objects in your project organized into a tree hierarchy.
- Interactive objects include Button, Label, Paragraph, RichText, Hotspot, Video, Flash, Web, Slideshow, Input, CheckBox, RadioButton, ListBox, ComboBox, Tree, Progress and more.
- Play up to 8 channels of audio simultaneously with automatic selection of either hardware or software mixing.
- Ready-to-use content including background images, photos, panels, bars, bullets, buttons, sound effects and music files.
- Build "stamped" applications with support for custom application icons and title bar icons, and editable version resource information.
- Includes over 500 actions and it's expandable with plugins and DLL's available from Indigo Rose and 3rd party developers.
- Script editor features color syntax highlighting, code completion, function highlighting, as-you-type action prototypes, Ctrl+Space function listings, and even context-sensitive help.
- Create applications with non-rectangular windows.
